

## XiSecure for SAP S/4HANA 2021SP2–2022

XiSecure SAP is the component used to integrate SAP to the XiSecure and Intercept tokenization platforms. It also has conversion programs to perform mass tokenization of credit cards, es AR utilities and reporting.

Version	Transport Files	Release Date
6.2.0 full	K900275.SV5 R900275.SV5	19 Feb 2025

### New Features and Enhancements

6.2.0 New Features and Enhancements
N/A

6.2.0 Problems Addressed
Fixed problems with transports when upgrading from ECC to HANA.

### Compatibility and Basic Requirements

- SAP S/4HANA 2021 SP2 and 2022
  - Transport zip filename: XiSecure\_SAP\_S4HANA2021SP2-2022.zip
- Paymetric SAP components:
  - PAS 2.10.0
  - PCMA 6.4.0 or higher 6.x versions

**Note:** XiSecure IK version 6.2.0 is not backward compatible with S/4HANA versions prior to 2021SP2. See [XiSecure-Intercept SAP Releases](#) page for other supported versions.

### Install and Configuration Notes

#### New Installs

This is a full transport. There are no release-specific installation notes. Refer to the *XiSecure-Intercept SAP S4HANA Integration Guide* for install, setup, and integration details.

## Upgrades

- If you are on a version prior to the latest full transport, install the full one and all subsequent patch transports.
- For ALL upgrades, even if XiSecure IMG modifications are not required for the upgrade, you must execute the XiSecure IMG transaction code (/n/PMENC/BIMG) to initiate the objects from the upgrade.
- When importing the transport(s),
  - The 'overwrite existing objects' flag should be selected since many of these are existing objects.
  - Allow sufficient time for each transport to complete before loading the next one to prevent syntax errors.
  - Any custom changes (including userexits configured in the Paymetric IMG's) should be evaluated and may need to be replicated in the new later versions of these userexits. There may be new PUE's (Paymetric userexits) that were not in your previous version - please review the documentation for details.
- If upgrading from a previous/older version of XiSecure SAP IK, it is advised you recreate any custom userexits that are configured in the /PMENC/BIMG. They should be recreated based on the new sample default userexits that are provided.
- As always, please test thoroughly before moving to PRD. If you would like to obtain consulting assistance with this install, please contact [Support Services](#).

## Objects Modified

This section identifies any objects modified that should be considered when upgrading if you have customizations as stated above under Upgrade section.

- N/A

## Supporting Integration Documents and Transports

- *XiSecure-Intercept SAP S4 Integration Guide*
- XiSecure\_SAP\_S4HANA2021SP2-2022.zip

Documents and transports are available for download from the Merchant Portal Resources page, or you can request from Support Services or your relationship manager or project consultant.
